 GI

AB Liq. cryst. compds. have trans-polyenes in the side chains. Also claimed are trans-polyene-containing liq. cryst. compds. I [R1 = H, cyano, halo, C1-20 linear or branched (halo)alkyl in which non-neighboring CH2 groups may be substituted with O or CH:CH groups; R2 = H, halo, C1-9 alkyl; R3 = H, halo; the rings A, B, C, and D indicate 1,4-phenylene, trans-1,4-cyclohexylene, bicyclo[1.1.0]butane, bicyclo[2.2.2]octane, cyclobutane, or spiro [3.3]heptane rings in which H atoms may be substituted with halogens and C atoms may be substituted with N or O atoms; l, m = 0, 1; n = 1-5]. Liq. cryst. compns. containing the trans-polyene compds. and Ph compds., and liq. crystal display devices using the compns. are also claimed. The liq. cryst. polyene compds. show high elastic constant ratios, low viscosity, and good compatibility with other liq. cryst. compds.
